PREFACE

When the *List of Serials in Public Libraries of Chicago and Evanston* was published by the Chicago Library Club in 1901 the statement was made that The John Crerar Library proposed, if it proved to be of real service, to issue cumulative supplements. The present volume is the first of these supplements. The justification of its publication would seem to be ample because of the proved usefulness of the original not only for the purpose for which it was compiled, in giving a scholar information where a given volume of a serial can be consulted most conveniently, but also, and somewhat unexpectedly, as a convenience in the administration of the libraries. In one library, at least, the original has been referred to constantly as the most convenient source of information in regard to its own sets. If it has been so used in other libraries to anything like the same extent it has been no inconsiderable factor in the improvement of the sets which is noted in this supplement, and the Chicago Library Club may well be congratulated on the success of its undertaking.

Another proof may be found in the readiness with which the libraries have furnished material for the supplement. Only one, St. Ignatius College, has not done so. It has been prevented by a change of librarians and the recataloguing of its library, and it hopes to be able to join in the next revision. On the other hand, the Chicago Historical Society, which was unable to furnish material for the original list, has done so for the supplement, thus materially enhancing its value and broadening its scope.

This volume should be consulted first in all cases, even when reference to the desired title from an older form or from the society publishing it, or to the desired society from a place, is found only in the original list. For reprinted titles all the entries have been reprinted so that it is unnecessary to consult the original for a title in the supplement. On the other hand, no titles have been reprinted except to give additional information or to correct errors of some importance, so that the entries for one publication of a society may be found in the supplement and for another in the original list.

The supplement, like the original list, is intended to include all serials not purely administrative, of which a library has (1) five volumes or years in sequence; (2) one-half of the set if less than ten volumes or years; (3) the first or last volume if not in any other library. There have been included, also, though somewhat incompletely, all state documents and the publications of all Chicago societies and institutions, whether administrative or not.

One change in the method of entry has been made by unanimous consent of the larger libraries. The entry of foreign serials having individual titles under the society has proved so inconvenient that such serials are now entered under the title, in accordance with the rule for American and English publications. Reference has been made from the societies in all cases where their agency is known. References are made also from the place of location of a society to the name of the society unless the reference occurs in the original list.

The changes of form of entry are very few. One or two minor changes have been made to secure greater clearness, and the capitalization has been altered to agree with the practice of The John Crerar Library.

There are in the supplement the titles of 4,060 serials and 440 references.

PREFACE

Of the titles 1,870 occur in the original list, 210 having been reprinted to correct errors or supply omissions in the original entries and 1,660 to give additional information. At least 500 of the latter record the completion of sets or the filling of gaps.

Of the 4,060 serials 2,730, or 67 per cent, are received currently, as against 57 per cent in the original list; 1,300, or 32 per cent, as against 36 per cent, are in languages other than English; 2,140 or 53 per cent, as against 65 per cent, occur in one library only; 740, or 18 per cent, the same percentage as in the original list, occur in two libraries only; 410, or 10 per cent, as against 9 per cent, are in three; 760, or 19 per cent, as against 8 per cent, are in four or more. The largely increased percentage of the last class and the consequent diminution in the percentage of those found in one library only are easily explained by the inclusion of state documents, which are received as gifts. Making due allowance for this and taking into account the small diminution in the percentage of foreign titles, it would seem to be established that the libraries of the city are maintaining their policy of discrimination and division of the field, and the standard of their acquisitions. The total number of serials recorded in the original list and the supplement is 8,840.

The supplement has been set with the linotype and the bars will be retained for future editions. While its size makes the issue of annual editions appear unadvisable it is hoped that they may be issued every other year until the accumulation of titles warrants the publication of a second edition of the original work.

REGULATIONS

The library is open to the public every day, excepting Sundays, from 9 a. m. to 10 p. m.

Books shelved in the Reading Room may be consulted without formality, but after use are to be left on the tables, instead of being replaced on the shelves.

Current periodicals may be consulted within the periodical alcove; and may be obtained for use at the tables in the Reading Room by presenting to the Periodical Clerk a serial call-slip properly filled out.

Books not shelved in the Reading Room may be obtained by presenting to the Delivery Clerk a book call-slip properly filled out. These books are to be returned to the delivery desk.

Persons engaged in special research, if satisfactorily vouched for, may be admitted to the Stack Room. All books used under this provision are to be left on the tables in the Stack Room.

Books of great value and rarity may be consulted only in the presence of an attendant.

Writing or marking in books belonging to the library, or their mutilation in any manner, is forbidden. The tracing of plans will be permitted if done over a celluloid cover, but not otherwise. These covers will be furnished upon application at the delivery desk.

A printed card catalogue has been prepared for the use of the public. It is in three sections, alphabetical author, alphabetical subject, and classed subject.

The Reference Librarian, in charge of the Reading Room, will give assistance in the use of the catalogue and the selection of books.
